Workflow Exploration Report

Deposit a Check and Confirm Posting in Account Activity

Website: <https://www.ngpf.org/bank-sim>

Feature Area: Check Deposit Simulation

Goal: Simulate check deposit by entering amount, selecting account, uploading required images, and confirming deposit. Success: user receives confirmation message and a new deposit record is visible in Account Activity.

Generated: March 23, 2026 at 11:01 AM

Confidence: 98%

The AI successfully completed a full check deposit workflow in the NGPF Bank Simulator, depositing \$100 to a checking account and receiving confirmation of the transaction. The deposit was verified by navigating to the Account Activity page, which showed the new deposit record with the correct amount and updated balance of \$316.04.

Step-by-Step Walkthrough

1. NGPF Bank Simulator Homepage

The AI navigates to the NGPF Bank Simulator welcome page, which displays an overview of available banking features including check deposits. The page shows the GET STARTED NOW button to begin the simulation.

<https://www.ngpf.org/bank-sim>

2. Bank Dashboard with Welcome Modal

The AI enters the bank simulator and sees the main dashboard with account balances (\$216.04 checking, \$230.00 savings). A welcome modal appears with an OK button to dismiss it and proceed.

3. Bank Simulator Main Dashboard

The AI successfully dismisses the welcome modal and views the complete dashboard interface. The sidebar shows navigation options including 'DEPOSIT CHECKS' which will be used for the check deposit workflow.

4. Check Deposit Form Loaded

The AI clicks on 'DEPOSIT CHECKS' and the deposit form appears with fields for account selection, amount entry, and check image uploads. The form shows dropdown for account selection and buttons for Front and Back check images.

5. Account Selection Dropdown Open

The AI clicks the account dropdown, revealing options for CHECKING (Available Balance \$216.04) and SAVING (Available Balance \$230.00). This allows selection of the destination account for the deposit.

The screenshot shows the 'Deposit Checks' page in the onlinebankSIM interface. On the left is a navigation menu with options: HOME, NOTIFICATIONS, ACCOUNTS, TRANSFERS, BILLS, DEPOSIT CHECKS, ONLINE SERVICES, MANAGE PROFILE, and SHOPPING. The main content area has a header 'Deposit Checks' and a sub-header 'You may deposit checks below by taking a clear picture of the front and back of the check with a solid background. Be sure to endorse (sign) the back of your check first!'. Below this is a dropdown menu labeled 'To *' with the text 'PLEASE SELECT AN ACCOUNT'. The dropdown is open, showing two options: 'CHECKING (Available Balance is \$216.04)' and 'SAVING (Available Balance is \$230.00)'. Below the dropdown is an 'Upload Check' section with buttons for 'Front' and 'Back', and a 'Submit' button that is currently disabled (greyed out). There is also a 'Cancel' button.

6. Checking Account Selected

The AI selects the CHECKING account from the dropdown, which now displays 'CHECKING (Available Balance is \$216.04)' in the account selection field. The form is ready for amount entry.

The screenshot shows the 'Deposit Checks' page after the account has been selected. The dropdown menu now displays 'CHECKING (Available Balance is \$216.04)'. Below the dropdown is an 'Amount *' field, which is currently empty. The 'Upload Check' section remains the same, with 'Front' and 'Back' buttons and a 'Submit' button that is now active (blue). The 'Cancel' button is still present.

7. Amount Entered - \$100.00

The AI enters \$100.00 in the amount field, completing the monetary portion of the deposit. The Submit button is now active, and the form shows the selected checking account and deposit amount.

<https://www.ngpf.org/bank-sim/deposit-check>

8. Front Check Image Modal

The AI clicks the Front button to simulate uploading the front check image. A modal appears displaying a sample check image from John Doe, demonstrating the front side image upload functionality.

<https://www.ngpf.org/bank-sim/deposit-check>

9. Back Check Image Modal

The AI clicks the Back button and a modal displays the back side of the check image, showing the endorsement area. This completes the image upload simulation for both sides of the check.

<https://www.ngpf.org/bank-sim/deposit-check>

10. Deposit Success Confirmation

The AI clicks Submit and receives a green success notification stating 'You have successfully deposited your check.' The account balance in the dropdown has updated to \$316.04, reflecting the completed deposit.

<https://www.ngpf.org/bank-sim/deposit-check>

11. Account Activity Verification

The AI navigates to Account Activity and verifies the deposit transaction appears in the transaction history. The record shows 'Deposit Check To Checking Account' for \$100.00 with a new balance of \$316.04, confirming successful deposit processing.

Discovered Test Scenarios

#	Scenario	Type	Priority
1	Check Deposit Workflow - Complete User Journey	e2e_business_workflow	high

Check Deposit Workflow - Complete User Journey

End-to-end check deposit simulation including form completion, image uploads, and verification

User navigates to NGPF Bank Simulator, accesses check deposit feature, completes deposit form with CHECKING account and \$100.00 amount, uploads simulated check images (front and back), submits deposit, receives confirmation, and verifies the transaction appears in account activity with correct details.

- Use waitForSelector for modals and dynamic content
- Handle Angular Material components with proper role selectors
- Close simulated check image modals after they appear
- Verify success notification and account balance changes
- Account activity verification requires navigation to accounts page
