Discovered Workflow: e2e_business_workflow - Complete User Journey

Comprehensive test covering the internal fund transfer process from start to finish.

The user initiates a transfer simulation, navigates through the dashboard to the transfer form, selects accounts, sets an amount, and successfully submits the transfer.

- Use `page.waitForURL` to confirm navigation after clicking 'Save'.
- Since the site uses Angular Material, use `pressSequentially()` for input fields if standard `fill()` causes validation issues.
- Ensure the date format matches the simulation requirements (MM/DD/YYYY).
