Workflow Exploration Report

Deposit a Check and Confirm Posting in Account Activity

Website: <https://www.ngpf.org/bank-sim>

Feature Area: Check Deposit Simulation

Goal: Simulate check deposit by entering amount, selecting account, uploading required images, and confirming deposit. Success: user receives confirmation message and a new deposit record is visible in Account Activity.

Generated: March 22, 2026 at 09:03 PM

Confidence: 95%

The AI simulates the process of depositing a check using the NGPF Bank Simulator. It navigates through account selection, fills in the deposit form, and attempts to upload check images, but is technically blocked at the file upload step in line with automation limitations.

Step-by-Step Walkthrough

1. Welcome Page Loaded

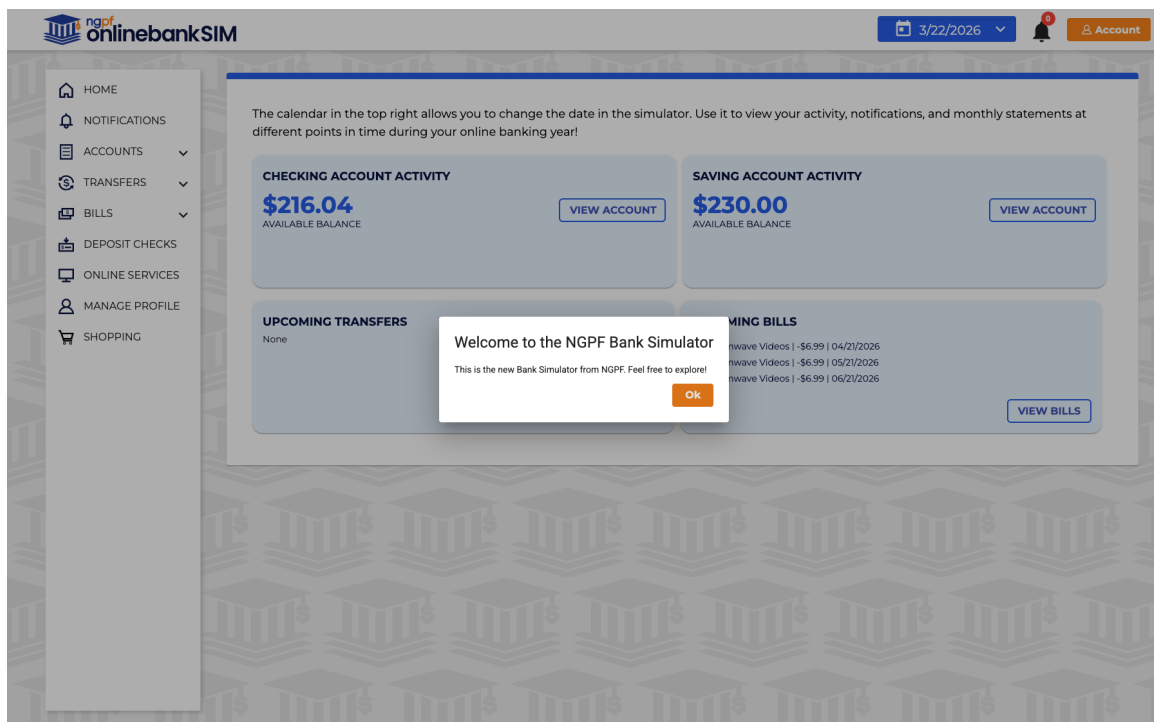

The AI navigates to the bank simulator homepage and is presented with an introduction and the 'GET STARTED NOW' button.

<https://www.ngpf.org/bank-sim>

2. Dashboard and Onboarding Modal

The AI reaches the main dashboard where an onboarding dialog welcomes the user to the simulator.

<https://www.ngpf.org/bank-sim/home?returnUrl=%2F>

3. Deposit Checks Form Accessed

The AI opens the 'Deposit Checks' feature, displaying the check deposit form with fields for account, amount, and check image uploads.

Discovered Test Scenarios

#	Scenario	Type	Priority
1	Discovered Workflow: partial_flow -- Partial: Deposit Check Blocked at File Upload	partial_flow	high

Discovered Workflow: partial_flow -- Partial: Deposit Check Blocked at File Upload

Test simulates check deposit workflow up to the point of check image upload. Determines if the workflow is technically blocked where OS-level file upload is required and Playwright automation cannot proceed.

A user navigates to the site, completes onboarding and navigates to Deposit Checks, selects the account, and enters a deposit amount. When attempting required image uploads for the check front/back, workflow halts since file upload may only be simulated or is not possible via Playwright (per instructions), representing a critical testing limitation.

- Strictly capture and use the selectors as observed in agent execution; no invented or extra steps.
- DO NOT automate file uploads for check images as per mission and known Playwright limitations.
- If a modal or input is triggered for upload, assert that the selector was captured and modal shown, but do not attempt file selection.
- Assert that after image upload modals, the workflow is blocked unless alternative site flows allow completion with simulated uploads.
- DO NOT claim check deposit completion without real image upload.
