The AI successfully navigated the NGPF Bank Simulator to execute an internal fund transfer. It completed the process by selecting the source and destination accounts, inputting the transfer amount, and verifying the transaction in the history log.

Step-by-Step Walkthrough

1. Accessing the Bank Simulator

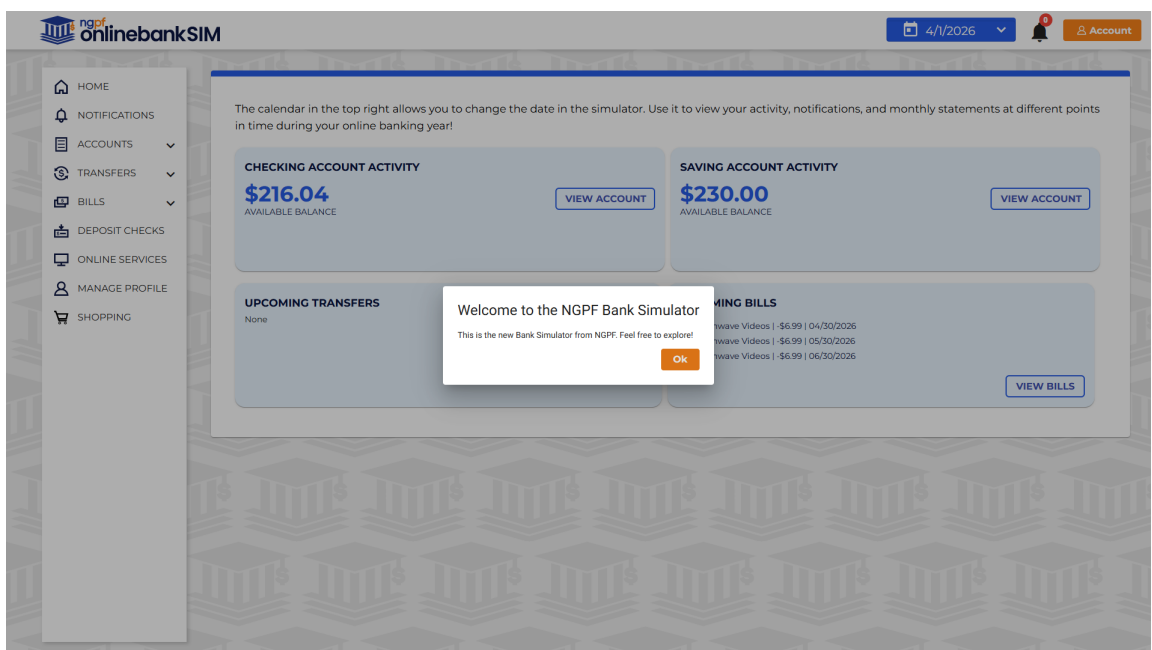

The AI navigates to the NGPF Bank Simulator homepage and initiates the simulation.

Discovered Workflow: Internal Fund Transfer - Complete User Journey

Comprehensive test covering the end-to-end fund transfer process from home page to transaction confirmation.

The user starts the simulation, navigates to the transfers section, selects a single payment frequency, chooses Checking as the source and Savings as the destination, inputs the transfer amount, and saves the transaction.

- Use `page.waitForURL` to confirm navigation after clicking 'GET STARTED NOW'.
- Since this uses Angular Material, use `page.click()` followed by `page.getByRole('option')` for dropdowns.
- Use `fill()` for the amount input field.
