Workflow Exploration Report

Bill Payment Execution

Website: <https://www.ngpf.org/bank-sim/home>

Feature Area: Banking Transactions

Goal: Submit a bill payment to a recipient.

Generated: April 01, 2026 at 01:45 PM

Confidence: 98%

The AI successfully completed an end-to-end bill payment workflow by navigating the banking simulator, creating a new recipient, and scheduling a single payment. The process was verified through the successful addition of the recipient and the final confirmation of the scheduled bill.

Step-by-Step Walkthrough

1. Accessing the Bank Simulator

The AI navigates to the NGPF Bank Simulator homepage to begin the simulation.

<https://www.ngpf.org/bank-sim/home>

2. Dashboard Initialization

The AI starts the simulation and dismisses the welcome modal to access the main dashboard.

<https://www.ngpf.org/bank-sim/home?returnUrl=%2Fhome%2F>

3. Navigating to Bill Payments

The AI expands the Bills menu and selects the Pay Bill option.

<https://www.ngpf.org/bank-sim/>

4. Configuring Payment Frequency

The AI sets the payment frequency to 'SINGLE' to prepare for the transaction.

5. Adding a New Recipient

The AI opens the recipient modal and populates the required contact and address details.

The screenshot shows the 'Pay a Bill' interface on the ngpf onlinebankSIM website. A modal titled 'Add RECIPIENT' is open, allowing the user to enter recipient details. The modal includes fields for 'RECIPIENT NAME' (with a placeholder 'Enter name'), 'ADDRESS' (with '440 Sleepy Hollow Dr.'), 'CITY' (with 'Chelsea'), 'STATE' (with 'MA'), and 'ZIP' (with '02150'). 'SUBMIT' and 'RESET' buttons are at the bottom right of the modal. The background page shows the 'Pay a Bill' header, a 'Pay From' dropdown set to 'CHECKING (Available Balance is \$216.04)', and a sidebar with navigation options like HOME, NOTIFICATIONS, ACCOUNTS, TRANSFERS, and PAY BILL.

6. Confirming Recipient Addition

The AI submits the new recipient details, confirming successful creation with a notification.

This screenshot shows the 'Pay a Bill' page after the recipient has been added. The 'Pay From' dropdown is still 'CHECKING (Available Balance is \$216.04)'. The 'Payment Frequency' is set to 'SINGLE'. The 'Recipient' dropdown now shows 'Test Recipient'. Below this is a '+ ADD RECIPIENT' link. The 'Payment Date' is set to '4/6/2026' with a calendar icon. A note states 'Bill will be scheduled in next 5 days'. The 'Amount' field is '\$ 0'. 'SUBMIT' and 'CANCEL' buttons are at the bottom. A green notification bar at the bottom right says 'Payee updated successfully.' The sidebar and top navigation remain the same.

7. Finalizing Bill Payment

The AI completes the payment submission, resulting in a successful scheduling confirmation.

Discovered Test Scenarios

#	Scenario	Type	Priority
1	Discovered Workflow: e2e_business_workflow - Complete User Journey	e2e_business_workflow	high

Discovered Workflow: e2e_business_workflow - Complete User Journey

Verify the full end-to-end flow of paying a bill by creating a new recipient.

The user starts the simulation, navigates to the bills section, adds a new recipient to bypass existing dropdown issues, and successfully submits a payment of 50.

- Use `page.waitForURL` to confirm navigation to `/pay-bill`.
- Use `pressSequentially()` for input fields inside mat-form-field components.
- Ensure the modal for adding a recipient is fully loaded before interacting with inputs.
