Initiate Digital Mortgage Application

Website: <https://mortgage.leumi.co.il>

Feature Area: Digital Mortgage Application

Goal: Initiate a digital mortgage application for in-principle approval. Success: User reaches the application form (Currently blocked).

Generated: May 07, 2026 at 05:44 AM

Confidence: 98%

The AI navigated to the beginners mortgage information page and successfully dismissed the chat popup. Attempts to proceed to the application form were unsuccessful, as the next step in the user journey is currently blocked.

Step-by-Step Walkthrough

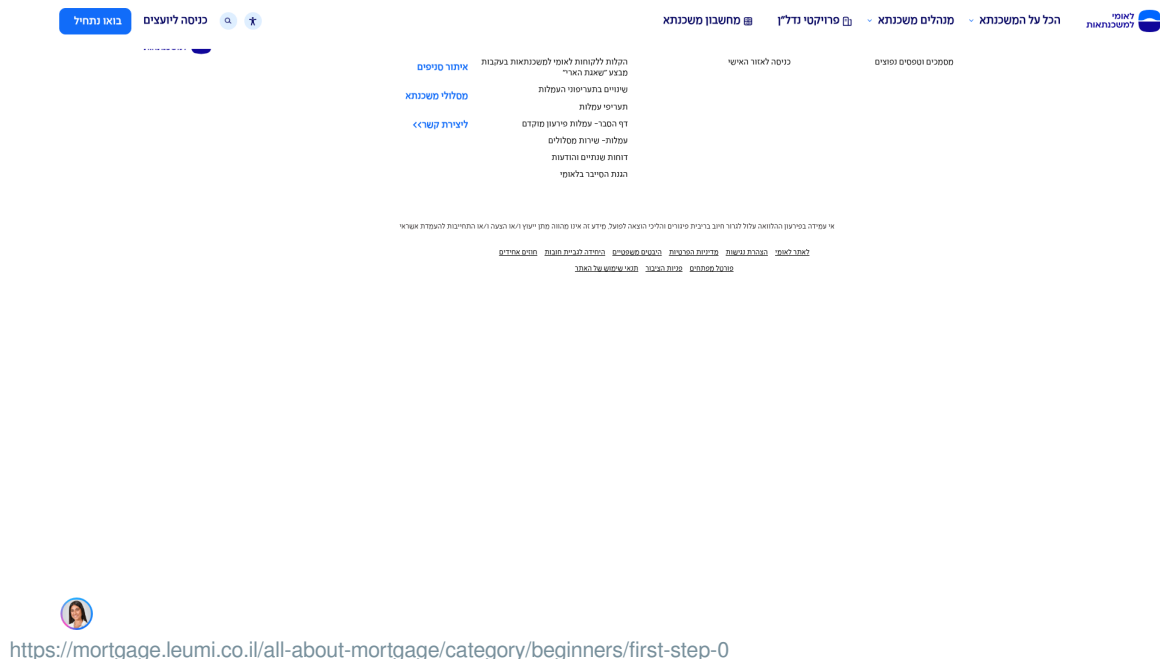

1. Beginners Mortgage Page Loaded

The AI navigates to the beginners mortgage page, where a chat popup is initially displayed in the bottom corner.

2. Chat Popup Dismissed

The AI closes the chat popup to remove the obstruction, clearing the view to interact with the start application button.

Discovered Test Scenarios

#	Scenario	Type	Priority
1	Discovered Workflow: Initiate Digital Mortgage Application - Complete User Journey	e2e_business_workflow	high

Discovered Workflow: Initiate Digital Mortgage Application - Complete User Journey

Verifies that a user can successfully navigate to the mortgage application minisite from the beginners informational page.

The user starts on the 'First Step' beginners page for mortgages. An obstructing chat popup appears, which the user closes. The user then clicks the 'ליחתנ ואוב' (Let's Start) button and is successfully redirected to the mortgage application minisite.

- Use `page.goto()` to navigate directly to the beginners page.
- Implement a conditional check or `waitForSelector` for the chat popup close button, as popups may not always appear or might take a moment to load.
- Ensure navigation to the minisite is verified by checking the resulting URL after clicking the start button.
