Workflow Exploration Report

Deposit a Check and Confirm Posting in Account Activity

Website: <https://www.ngpf.org/bank-sim>

Feature Area: Check Deposit Simulation

Goal: Simulate check deposit by entering amount, selecting account, uploading required images, and confirming deposit. Success: user receives confirmation message and a new deposit record is visible in Account Activity.

Generated: March 23, 2026 at 11:34 AM

Confidence: 97%

The AI successfully completed an end-to-end check deposit workflow on the NGPF Bank Simulator, navigating from the landing page through account selection and form submission. A \$100.00 deposit was made to the Checking account, resulting in a green success toast notification and a new transaction record 'Deposit Check To Checking Account' visible in Account Activity with an updated balance of \$316.04.

Step-by-Step Walkthrough

1. NGPF Bank Simulator Landing Page

The AI lands on the NGPF Bank Simulator homepage, where the welcome screen highlights key features including check deposits, bill payments, and account activity. The 'GET STARTED NOW' button is visible and ready to be clicked.

<https://www.ngpf.org/bank-sim>

2. Dashboard Loads with Welcome Modal

After clicking 'GET STARTED NOW', the AI is redirected to the main dashboard showing Checking (\$216.04) and Saving (\$230.00) account balances. A welcome modal prompts the user to acknowledge before proceeding.

<https://www.ngpf.org/bank-sim/home?returnUrl=%2F>

3. Main Dashboard After Modal Dismissed

The AI dismisses the welcome modal by clicking 'Ok', revealing the full dashboard with account summaries, upcoming transfers, and upcoming bills. The sidebar navigation including 'DEPOSIT CHECKS' is now accessible.

<https://www.ngpf.org/bank-sim/>

4. Deposit Checks Form Loaded

The AI navigates to the Deposit Checks section via the sidebar, loading the deposit form with fields for account selection ('To'), deposit amount, check image uploads (Front/Back), and Submit/Cancel buttons.

<https://www.ngpf.org/bank-sim/>

5. Account Dropdown Options Displayed

The AI clicks the 'To' dropdown to open the account selection listbox, revealing two options: 'CHECKING (Available Balance is \$216.04)' and 'SAVING (Available Balance is \$230.00)'.

The screenshot shows the 'Deposit Checks' page in the onlinebankSIM interface. On the left is a navigation menu with links: HOME, NOTIFICATIONS, ACCOUNTS, TRANSFERS, BILLS, DEPOSIT CHECKS, ONLINE SERVICES, MANAGE PROFILE, and SHOPPING. The main content area has a title 'Deposit Checks' and a sub-header 'You may deposit checks below by taking a clear picture of the front and back of the check with a solid background. Be sure to endorse (sign) the back of your check first!'. Below this is a 'To' dropdown menu that is open, displaying two options: 'CHECKING (Available Balance is \$216.04)' and 'SAVING (Available Balance is \$230.00)'. Under the dropdown is an 'Upload Check' section with 'Front' and 'Back' camera icons, and 'Submit' and 'Cancel' buttons. The 'Submit' button is currently disabled (greyed out).

6. Checking Account Selected

The AI selects 'CHECKING (Available Balance is \$216.04)' from the dropdown, which closes the listbox and populates the 'To' field with the chosen account, ready for the amount to be entered.

This screenshot shows the same 'Deposit Checks' page after the account has been selected. The 'To' dropdown is now closed, and the text 'CHECKING (Available Balance is \$216.04)' is displayed within the dropdown's container. Below this is an empty 'Amount' input field with a dollar sign icon. The 'Upload Check' section remains the same. The 'Submit' button is now active and colored orange, while the 'Cancel' button remains greyed out.

7. Deposit Amount Entered as \$100.00

The AI types '100.00' into the Amount field, completing the required form fields. The Submit button becomes active (orange), indicating the form is ready for submission.

Discovered Workflow: Check Deposit Simulation - Complete User Journey

End-to-end test verifying that a user can land on the NGPF Bank Simulator, dismiss the welcome modal, navigate to Deposit Checks, select the CHECKING account, enter a deposit amount of \$100.00, submit the form without image uploads (simulator accepts submission without them), receive a green confirmation toast, and confirm the new deposit record is visible in Account Activity.

A student opens the NGPF Bank Simulator at <https://www.ngpf.org/bank-sim>. After clicking 'GET STARTED NOW' on the welcome screen, a modal greets them — they dismiss it with 'Ok'. From the sidebar, they navigate to 'DEPOSIT CHECKS'. On the deposit form, they select 'CHECKING' as the destination account and enter \$100.00 as the check amount. Notably, the simulator does not require actual check image uploads — clicking 'Submit' processes the deposit directly. The user receives a green toast confirmation: 'You have successfully deposited your check.' The app then redirects to Account Activity (<https://www.ngpf.org/bank-sim/account>) where the new deposit row — ID 1200044, Date 03/23/2026, Description 'Deposit Check To Checking Account', Amount \$100.00, Balance \$316.04 — is visible.

- Use ``waitUntil: 'domcontentloaded'`` on initial navigation; the app redirects to `/bank-sim/home?returnUrl=%2F` before settling at `/bank-sim/`.
- After clicking 'GET STARTED NOW', wait for the welcome dialog to appear before attempting to click 'Ok' — use ``page.waitForSelector('[role="dialog"]')`` or ``page.getByRole('button', { name: 'Ok' }).waitFor()``.
- The 'To' account dropdown is a Angular Material ``mat-select`` (combobox). After clicking it, wait for the listbox overlay to render before clicking the option: ``page.getByRole('option', { name: 'CHECKING (Available Balance' })``.
- The Amount input is inside a ``mat-form-field``. Use ``fill('100.00')`` or ``pressSequentially('100.00')`` on the textbox. Ensure the field is cleared before typing.
- No file uploads are required — the simulator accepts submission without check images. Do not attempt to interact with Front/Back upload buttons.
- After clicking Submit, the app navigates to ``https://www.ngpf.org/bank-sim/account``. Use ``page.waitForURL('**/account')`` to confirm redirect.
- The success toast ('You have successfully deposited your check.') may disappear quickly — assert its presence immediately after submit using ``page.waitForSelector`` with a short timeout, or capture it before navigation completes.
- Verify the new deposit row in Account Activity by asserting visible text such as 'Deposit Check To Checking Account' and '\$100.00' on the `/account` page.
- The sidebar navigation link is inside an Angular ``app-menu-list-item`` component — use ``page.locator('a').filter({ hasText: 'DEPOSIT CHECKS' })`` for reliable targeting.
- All Angular Material components (`mat-select`, `mat-option`, `mat-dialog`) are rendered in portal overlays — selectors targeting ``[role="listbox"]`` or ``[role="dialog"]`` will be needed for robust scoping.
